Marion County Health Department Concerns

1. K-12 School kitchens are licensed and inspected by the County Health Department. Contact the County Health Department where your school is located.
2. In Marion County, the two types of licenses a school might receive are: a full service kitchen and a satellite-feeding site (where the food is prepared at a licensed commissary and transported to the school).
3. A satellite-feeding site does require certain equipment such as a hand sink, 3-bay utensil sink, mop sink and hot/cold holding equipment depending on the amount of food preparation at the site.
4. Install commercial foodservice equipment only. Homestyle refrigerators, freezers, stoves, exhaust hoods and other equipment cannot be approved.
5. The Indiana State Department of Health will also inspect. You will need to contact them separately. The phone number is (317) 233-7177
